

Number game

Here is a game to play with the Beaver Scouts. Below are the numbers one to five and their equivalent in Lugandan.

Lugandan is one of the languages spoken in Uganda.

- 1-Emu
- 2-Biri
- 3-Satu
- 4-Nya
- 5-Tano

First teach the Beaver Scouts how to count to five in Lugandan as above.

The Colony can then disperse around room. The Leader calls out a number in Lugandan and youngsters form themselves into groups of that number. Beaver Scouts who fail to get into groups drop out and game continues.

Variations: The Beaver Scout Leader calls out two numbers in Ugandan and the Beaver Scouts must add them up before then forming into groups.
